ABOUT

I am a Senior Frontend Developer with 4.5 years of experience crafting high performance and visually compelling web and mobile applications. I have shipped products used by real businesses from B2B ecommerce platforms and digital health tools to AI-driven content engines. I am driven by the challenge of turning complex problems into clean, intuitive solutions.

WORK EXPERIENCE - 4.5 YEARS

Software Engineer (Vue, Next JS, Remix JS & React Native)

Company: Genesys Softwares

July 2025 - Continue

- Developed [Pengine](#), an intuitive platform for print-on-demand offering seamless Shopify integration, automation, and inventory management.
- Delivered [Athletes Thread](#), a B2C apparel e-commerce web application, designed to sell NFL fan gear.
- Led the development of [Taskgrid](#), a project management platform, integrating tasks, real-time chat, time tracking, and analytics for a scalable system
- Managed the development of [Egshop](#), an easy-to-use e-commerce platform for Bangladeshi entrepreneurs to launch their stores without coding.

Software Engineer (Next JS, React Native & Node JS)

Company: Healthx & Biztrade BD

June 2024 - June 2025

- Designed and developed [BIZTRADE](#), a B2B & B2C ecommerce marketplace and business advisory platform.
- Built a mobile app for [Healthx](#), a digital healthcare platform providing essential healthcare services.
- Maintained existing WordPress sites for internal and existing business needs.

Senior Front-End Engineer (React, Redux & OpenAI)

Company: Xpertsolvers IT

Feb 2022 - Apr 2024

- Launched an AI-powered Shopify app. [Blogxpert](#) - an app designed to generate unlimited SEO optimized articles, titles, and meta descriptions.
- Developed a medical software along with a website for an eye hospital featuring multi-layer management systems for patients, doctors, and admins.

PROJECTS

1. Biztrade (B2B, B2C, and SME Loan Application)

[Live](#)

- Developed frontend, admin, and seller panel effectively with Next.js, maintaining SSR
- Designed an animated component, flowless validation for multiple roles.
- Utilized SCSS for maintainable styling with responsive design across all devices.

2. Healthx (Web and Mobile application)

[Website](#) [App](#)

- Implement frontend with Next.js, following SEO best practices for optimized performance and discoverability.
- Utilize Redux, RTK QUERY for complex state management, and efficient data loading
- Leveraged React Native for a fast and responsive mobile app.
